About the Author	xv
About the Technical Reviewer	xvi
Acknowledgments	xvii
Introduction	xix

CHAPTER 1	Get to Know the GIMP	1
	What Is the GIMP?	1
	A Tour of the Important GIMP Windows and Menus	2
	The Toolbox Window	2
	The Layers Dialog	3
	The Tool Options Dialog	4
	Image Windows	5
	Grouping Dialogs by Docking	10
	GIMP Settings You Can Customize	13
	Environment	13
	User Interface and Keyboard Shortcuts	14
	Theme	15
	Help System	16
	Tool Options	16
	Toolbox	18
	Default Image	18
	Default Grid	20
	Image Windows	20
	Display	21
	Color Management	21
	Input Devices	22
	Window Management	22
	Folders	23
	A First GIMP Project	23
	Summary	26

CHAPTER 2	Improving Digital Photos	27
	Opening Files	27
	Rescaling	29
	What Size Should You Choose for Your Images?	30
	The Scale Tool	32
	Saving Files	32
	Image File Types	33
	JPEG	34
	GIF	34
	PNG	35
	XCF	35
	TIFF	35
	Other Formats	36
	Experimenting with JPEG and GIF Settings	36
	JPEG Quality Settings	37
	GIF and Indexed PNG Quality Settings	39
	Cropping	42
	Brightening and Darkening	44
	Brightness-Contrast	44
	Levels	47
	Curves	52
	Other Exposure Adjustments	54
	Rotating	58
	Rotating by Multiples of 90 Degrees	58
	Free Rotation	58
	Sharpening	62
	Fixing Red-eye	66
	Summary	71
 CHAPTER 3	 Introduction to Layers	 73
	What Is a Layer?	74
	Using Layers to Add Text	76
	The Text Tool	78
	Using the Move Tool	82
	Changing Colors	85
	The GIMP's Color Chooser	88
	Simple Effects Using Layers	89
	Drop Shadows	89
	Linking Layers Together	93

Performing Operations on Layers	94
Using Layers for Copy and Paste	96
Select Only the Part You Want to Paste	96
Paste into the Image	98
Scale the Pasted Layer	99
A Tour of the Layers Dialog	101
Title Area	102
Tabs	102
Layer Mode	102
Opacity	102
Layers List	103
Layer Buttons	104
Layer Context Menus	105
Bonus Project: Making Simple GIF Animations	107
Create a Base Image	107
Add the Animation Frames	108
Give Each Frame Its Own Background	110
Test Your Animation	113
Animation for the Web: Save as GIF	113
Summary	115

CHAPTER 4 Drawing

A New Image	117
Using Layers for Drawing	119
Drawing Lines and Curves	121
Drawing Hard Edged Lines: The Pencil Tool	121
Brushes	122
Drawing Tool Options	127
Drawing Fuzzy or Smooth Lines: The Paintbrush Tool	128
The Airbrush Tool	130
The Ink Pen Tool	131
The Eraser Tool	134
Drawing Rectangles, Circles, and Other Shapes	135
Defining Regions	135
Outlining Selections: Stroking	136
Free Select with the Lasso	138
Filling Regions	138
The Bucket Fill Tool	139
Patterns	142
Gradients	143

A Drawing Project	147
Drawing a Tree	147
Making a Box Using Perspective Transformation	153
Preparing the Planter Box	161
Increasing Canvas Size	161
Plant the Tree	164
Final Touch-Ups	164
Summary	166
 ■ CHAPTER 5 Selection	167
Working with Selections	168
Marching Ants	168
The Select Menu	168
Moving Selections	170
Select by Color and Fuzzy Select	171
Select Contiguous Regions	174
Bezier Paths	174
Defining a Path	175
The Paths Dialog	177
Curved Paths	184
Adding Nodes or Segments and Moving Paths	185
Moving or Modifying an Existing Path	185
The Intelligent Scissors	186
Modifying Selections with Selection Modes	187
The QuickMask	191
Highlighting Foreground Objects	196
Using Channel Masks to Save a Selection	197
Layer Masks	203
Extracting Foreground Objects with SIOX	213
Summary	217
 ■ CHAPTER 6 Erasing and Touching Up	219
Dimming Highlights with Dodge and Burn	219
Dodging	221
Burning	222
Smudging Blemishes Away	225
The Clone Tool, For More Difficult Jobs	229
Setting the Clone Source	232
Fine-tuning a Clone Job	235
Clone Tool Options	236

Copying Small Regions	237
Sharpening or Blurring Specific Regions: The Convolve Tool	240
Sharpening with the Convolve Tool	242
Blurring with the Convolve Tool	242
Blurring Backgrounds with Gaussian Blur	245
Correcting Color Balance	247
Hue-Saturation	248
Color Balance	250
Using Curves or Levels for Balancing Colors	251
Summary	253

CHAPTER 7 Filters and Effects 255

Image Window Filters vs. Toolbox Xtns	255
Filters for Images	256
Tools vs. Plug-Ins	256
The Filters Menu	257
Blur	257
Enhance	259
Distorts	259
Light and Shadow	266
Noise Filters	268
Edge-Detection Filters	270
“Generic” Filters	272
Combine	272
The Artistic Filters	273
The Map Filters	279
Adding Patterns to a Layer	285
Filters to Help Make Web Pages	290
Animation Helpers	292
Alpha to Logo	292
Decor	293
Scripts to Make New Images: The Xtns Menu	294
Summary	295

CHAPTER 8 Color Manipulation, Channels, and Layer Modes 297

A Review of RGB and CMY Color	298
Additive Colors	298
Subtractive Colors	299
The Relationship Between Additive and Subtractive Systems	299
Color Depth	300

The Indexed Palette	301
Representing RGB Color in Web Pages	301
Working in HSV	302
Why Use HSV?	303
Working for Print: CMYK	303
CMYK for Professional Printers	304
GIMP's Alternative Color Choosers	304
The Triangle Color Selector	305
The CMYK Tab	305
The Watercolor Selector	306
Working with Grayscale or Black and White	306
Methods of Measuring Brightness	307
Grayscale Mode	308
Desaturate	308
Hue-Saturation	308
Decompose	309
Channel Mixer	311
Coloring Monochrome Images and Making Sepia Photos	311
Automatic Conversion with the "Old Photo" Filter	312
Manual Conversion for Fine Control	313
Using Threshold to Clean Up Scans	315
Indexed Color	317
A Typical Indexing Problem: Choosing the Palette	318
Dithering an Indexed Image	319
Redesigning for Better Indexed Results	320
Pick Colors from the Image	322
The Color Channels	323
How to Use Color Decomposition	324
Use Threshold and QuickMask to Improve the Selection	326
Decomposing to HSV	327
Color Profiles	330
Summary	331

CHAPTER 9 **Advanced Drawing**

Useful Mask Tricks	333
Making Text "Fade Out"	333
Making a Fuzzy Border	334
Even Bigger Fuzzy Borders	337
Interpreting the Mask Border Color	340
Layer Modes	341

A Quick Tour Through All of the GIMP's Layer Modes	343
Addition, Subtract, and Difference	344
Multiply and Divide	345
Dodge and Burn, Screen and Overlay	345
Hard and Soft Lights	346
Darken or Lighten Only	347
Grain Extract and Grain Merge	347
Hue, Color, Saturation, and Value	347
Creating Depth: Drawing with Layer Modes	348
Combining Layer Modes: Making 3-D Letters	351
Drawing Realistic Shadows	357
Using an Object to Cast Its Own Shadow	358
Transparency: Add the Final Tweak	359
Realism and Multipoint Perspective	360
Single-Point Perspective	361
Two-Point Perspective	361
Adding Reflections and Shading	363
Making Brushes, Patterns, and Gradients	368
Making Brushes	368
Making Patterns	374
Making Gradients	377
Summary	379

CHAPTER 10 Advanced Compositing 381

Colorizing Images	381
Improving Photos by Self-Compositing with Layer Modes	384
Using Screen Mode for Dark Images	385
Using Overlay or Hard Light When Light is Flat	386
Using Overlay or Burn to Cut Through Haze	387
Making Photos into Art: Self-Compositing with Modifications	390
Making "Drawings" and Other Effects Using Layer Offset	390
Adding Blurs and Other Tricks for Artistic Effects	395
Compositing Unrelated Images	396
Using Soft Light for Combining Images	396
Using Overlay for Dark Images	397
Using Screen to Get a Lighter Effect	399
Using Addition to Complement Light and Dark	399
Using Subtract to Make a Cut-out Mask	400
Making Eerie Colors with Burn	402
Using Grain Merge to Add Texture	403

Stacking Images	404
Reducing Noise	405
Loading All the Images as Layers	405
Registering the Images Using Difference Mode	405
Increasing Light by Additive Stacking	406
Increasing Contrast by Multiplicative Stacking	407
Increasing Resolution by Averaging	409
Stitching Panoramas	409
Shooting the Images	410
Decide on a Resolution	411
Calculate Your Expected New Image Size	411
Load the First Two Images	412
Make a Gradient Layer Mask	412
Fine-Tune the Position of the Second Image	413
Adjust the Layer Mask	414
Adjust with Other Tools if Necessary	415
Add the Rest of the Images	415
Final Adjustments	415
Summary	416

CHAPTER 11 Plug-Ins and Scripting

Plug-Ins	418
The Plug-In Browser	418
Finding Plug-Ins	419
Installing a Plug-In	420
Writing GIMP Scripts	422
Script-Fu (= Scheme = Lisp)	422
Python	422
Perl	423
Reading and Modifying a Script	423
User Interface Options for Scripts	437
A Python Script	439
Finding Out How to Do Things: The GIMP PDB	442
A Perl Script	443
Writing a C Plug-In	444
A Tour Through Zealous Crop	445
The run Procedure	447
The Routine That Does the Work	449
Getting Pixels: Tiles and Pixel Regions	450
Searching the Image for Blank Rows and Columns	452

Writing to Pixel Regions	453
Making a New Plug-In	454
Layer Coordinates vs. Image Coordinates	455
Setting Boundaries	456
Handling the Edges One at a Time	457
Summary	458
CHAPTER 12 Additional Topics	459
Printing with Gimp-Print or Gutenprint	459
Setting Your Printer Model	460
Set Print Size, Paper Type, and Resolution	461
Setting the Image's Position, Orientation, and Size	462
Making the Print: The Buttons at the Bottom	463
Fine-Tuning: Image/Output Settings	463
Print to File	464
Screen Shots and Scanners: the Acquire Menu	465
Scanning from GIMP	465
Screen Shots	465
GIMP Configuration Files	467
gimprc	468
Changing Preview Sizes with gtkrc	471
GIMP's Window Positions and Configuration: sessionrc	472
Menu Entries and Key Bindings: menurc	473
Other Files	473
Folders Inside the GIMP Profile	474
Additional Resources	475
Official GIMP Documentation	475
The Wiki	477
Other Tutorial Sites	477
Mailing Lists	478
Reporting Bugs	479
Finding Source Code at cvs.gnome.org	481
Where to Find Freely Available Images	481
Art Sites and Imaging Contests	482
Summary and Conclusion	483
APPENDIX A Getting and Installing the GIMP	485
Requirements	485
Where to Find the GIMP	486
Notes on the OS-specific Installation Appendixes	486

APPENDIX B	Installing the GIMP on Windows	487
	The Quick Start Version	487
	The Longer Version: Getting the GIMP	488
	Installing GTK+	489
	Installing the GIMP	489
	Cleaning Up	491
APPENDIX C	Installing the GIMP on Mac	493
	Requirements	493
	The Quick Start Version	493
	The Longer Version: Getting the GIMP	494
	If You Need to Get X11	495
	If You Need to Install X11	496
	Installing Gimp.app	496
	Other GIMPs and X11s for OS X	497
	Cleaning Up	498
APPENDIX D	Installing the GIMP on Linux or Unix	499
	Installation Notes for Various Distributions	499
	Red Hat	500
	SuSE	500
	Debian Variants	500
	Linspire	500
	Mandriva	500
	FreeBSD and NetBSD	500
	Other Unix Versions	501
APPENDIX E	Building from Source	503
	Getting the Source	503
APPENDIX F	First Startup	507
INDEX		509
