

Abstract:

Historic houses, as one of the cultural heritage resources are narrator of the indigenous culture and identity and existence of the Iranian society index so preserving and protecting of them are important.

One of the most precious monuments of the Mazandaran province are remained houses from Qajar period, which contain logical and national values.

Amol as an important city in the province has a lot of historical monuments and buildings, that we can mention Qajar houses as individual unique characters in the province.

Therefore, in this study by selecting one of the historic houses of Amol named "Quraishi" House in the historic textile, a step toward for understanding the physical assessment of cultural resources in this area has been taken.

This research aims was understanding of the history and current situation of the house, Pathology and finally presenting preservation, restoration and rehabilitation plans, that has been restored by insitu and library research methods and method of the analysis and analytic of data has been descriptive and analytical.

after investigation of understanding and pathology and presenting of presentation and restoration plans, in order to rehabilitate of this house, proposal plan as title of Amol fondation has been presented. According to residential textile and existence several historic houses this pattern can be a model for other landowners.
